I note your application for a tree protection order for the 6 pine trees situated on my property and can understand the wish to protect them.  
I must however point out one tree at the corner of queens road has a lean and I am concerned if it is a danger and would welcome your advice in this matter.  
I have lived here for 18 years plus and have always tried to ensure there well being.

My other concern is these trees are next to pavements covering a length of over 100 Mtrs I have supplied pictures of the leaning tree on the corner of queens road and the crescent also the area dug up adjacent to one of my trees when but spent a day with a road drill cutting very close to the tree pictures supplied
