

## Appendix A - Questionnaire commentary

# Environmental Enforcement responses from Questionnaire

Provide the officers with bicycles so that they can cover a greater area

I wish there could be more enforcement of keeping dogs on leads - there are quite a few dogs in the park that are aggressive and that owners make no attempt to control/keep on a lead.

I believe it frees up time for the Park Police and makes behaviour generally better for all concerned.

By having toilet facilities which are open when the cafe is closed. At present lots of people use the park outside of the cafe opening hours and having somewhere to go would have a positive impact on some of the human waste in the park

When offenders are not officially challenged and made to clear up their litter, it needs to be removed more promptly.

take part, take pride

## BBQ responses from Questionnaire

I noticed most people were respectful of place and cleaned up after themselves. . some concern over noise but big park so others can move into quieter location.

They are a good idea to encourage people out of their homes, and socialising! Especially for those without a garden who cannot bbq at home

They encourage families and community groups to enjoy a different type of social activity safely in the open, attractive and natural environment of Beddington Park.

Think barbecues should be discouraged. They increase rubbish.

There is no reason why people can't just have a normal picnic

Litter is probably the worst issue the mess people leave behind in the grass. Even when they use the bins these end up overflowing and the matter is exasperated by the wildlife pulling out the rubbish to get scraps. There are still large noisy groups. Lack of toilet facilities resulting in human waste in the wooded areas.

take part, take pride

Appendix A - Questionnaire commentary

# Parking responses from Questionnaire

Given the huge number of cars incorrectly parked. It is obvious drivers have not felt the ground markings are clear and what is considered an access road.

If you intend to keep this then there should be a minimum of two officer during the summer periods.

There is plenty of parking if people use it correctly. People still park even where it says no parking. Hopefully they receive a fine.

Open the field at the top of Church Rd for parking (as done for special events) - charge to cover costs

It seems to me that on certain days there is just not enough parking for everyone

However the enforcement officers need to be more consistent with their ticketing. They also need to perhaps be in charge of certain parts of the park as some areas eg by the church were neglected and where the parking restrictions were working it pushed cars back out to church road which because hazardous.
