Signed		Date	7 May 2021

1 Summary

- 1.1 Sutton council is ambitious to maximise the value of partnership working to deliver better health and social care outcomes for local people. The board will receive a presentation on the implications of the recent NHS whitepaper for the development of the South West London Integrated Care System and the Sutton Integrated Care Place.

2 Recommendation(s)

- 2.1 The board is asked to discuss and note the next steps for the future development of the Sutton Integrated Care Place.

Title of report*Indicative Timing:***3 Background and Key Information**

- 3.1 Sutton has a strong track record of local partnership working on health and social care and an ambitious local health care plan which aims to help residents Start Well, Live Well and Age Well.
- 3.2 The recent white paper has important implications for the South West London Integrated Care System which will become a statutory NHS organisation incorporating the functions of the current South West London CCG. The proposed timeline for this change is 1 April 2022.
- 3.3 The new arrangements are intended to strengthen the relationships of the NHS with partners at a borough-level and include the formation of a new local Transition team with local authority representation.
- 3.4 One initial focus of the transition team will be the refresh of the local health and care plan taking into account the learning from the joint working that occurred in response to the COVID-19 pandemic.

4 Benefits to Sutton and its Residents

- 4.1 A successful transfer to the new ICS arrangements and the formation of the new governance structures around Sutton's Integrated Care Place will allow the council and partners to accelerate the delivery of our local Sutton Health and Care Plan. This in turn will lead to more joined-up and improved health and social care services for local people.

5 Implications

- 5.1 The success of the new local arrangements will be key to ensuring the continued improvement of services for local people.

Title of report*Indicative Timing:***6 Finance and Legal Commentary**Finance Comment

- 6.1 The Council has a strong track record of working in partnership with the NHS to develop and deliver integrated local health and care services. This partnership enables us to deliver increased value from our collective resources in supporting local residents with health and care needs.
- 6.2 The proposed ICS provides a framework for greater collaboration between partners in health and care systems in meeting critical health and care challenges. This, with the potential for stronger emphasis on supporting joint commissioning and delivery of health, care and wellbeing services at place level with devolution of NHS decision making and resources to the local area does offer opportunities to utilise and target resources more efficiently and effectively in meeting local needs. Whilst a positive development and opportunity to enable more seamless health and care services from a service user perspective, there are other interdependencies including the need for a sustainable solution to the funding of social care.

Financial Risks

- 6.3 The Council will be represented in the transition working group and help to shape how the ICS will work in future. There is a risk that financial arrangements may need to change from the existing arrangements, which poses a risk of increased costs falling to the Council. This will be managed by effective engagement with the transition work and continued collaboration to ensure the Council's services, and financial resources, are appropriately considered in future planning.
